Strong winds cause minor damage in area

By Charles Clayton

Herald Banner Staff

Strong winds spurred on by a cold front which moved rapidly through the northern portion of Hunt County Saturday caused electrical outages and uprooted trees, but no injuries or major structural damages were reported.

A funnel cloud reportedly was spotted in Leonard around 6:03 p.m.

"It did some damage," said Leonard resident Jerry Chennault of the high winds. "A portion of the roof on the county barn blew off and several trees were uprooted. We're still without electricity."

Chennault said his son, Jason Chennault, who works for the Texas Department of Highways, was called in to assist in removing fallen trees from roadways following the storm.

"It was bad, but it could have been much worse," Chennault said.

Celeste also was in the path of the violent gusts of winds. No major damage was reported, however, the city was without power for several hours and felled trees blocked roadways.

Orville Hooks of Celeste said he recorded speeds up to 49 mph on his wind gauge at home.

"There were some pretty good gusts. I picked up 49 and 42 mph winds and it held steady at 35 mph for some time."

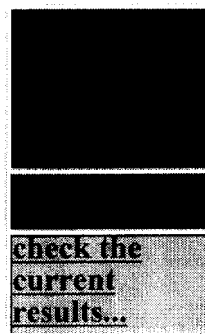

Hooks said the power outage lasted from 5:40 p.m.

Highs: 94°

Lows: 66°

to 7:40 p.m. He speculated that the power loss was due to tree limbs falling on electrical lines or blown transformers.

Celeste Police Dispatcher dispatcher Natalie Hollis reported high winds followed by lots of rain. Hollis said there also was interruption to telephone service in the wake of the storm.

Dale Chennault estimated wind gusts up to 40 mph in Celeste. He reported tree limb damage around his home, but no structural damage to his resident or others in the neighborhood.

"It was straight line wind. No funnel clouds," he observed.

"A big tree fell across the road, but the neighbors pitched in to cut it up and move it out," said Brian Green of Celeste. "The fire department also was busy removing trees and fallen power lines from roadways," he stated.

Downed power lines also was the major concern in Greenville. Police Sgt. Charles Starnes said they started receiving calls from all over town once the storm hit.

"Most of the calls were regarding trees down and power outages," he said.

Power problems at the police station affected the computer and communications for a brief period of time. There was no 911 service for nearly half an hour before power was restored. The Hunt County Sheriff's Office provided backup during the interim.

A Sheriff's Office dispatcher said there was structural and tree damage throughout the county, but no injuries. She said a funnel cloud was reported at Lake Tawakoni east of the Two-Mile Bridge.

According to The Associated Press, the cold front moved southward out of Oklahoma spawning thunderstorms over West and North Texas Saturday and possibly two tornadoes.

Thunderstorms formed along the leading edge of the cold front as it moved along. A line of thunderstorms moving northeast along the front battered the Antelope community in Jack County, 85 miles northwest of Fort Worth.

Spotty hail was reported around Hunt County, but there was no significant accumulation or damage caused. Rainfall was measured at approximately at a quarter of an inch.

Chances of showers and thunderstorms should continue across the state as the cold front continues to push southward. Weather otherwise today should be warm and windy with temperatures mostly in the 90s, except for parts of the Far West and Deep South where temperatures could climb into the 100s.
